

IAM Services Rationalization
Proposed Invitation to Participate in Workshops

To: Members of DTAG, ITAG and the IAM Council

From: DTAG EC, ITAG EC and IAM Council EC

Subject: Seeking your input on campus Identify and Access Management (IAM) services

Campus technologists,

The IT Service Inventory indicates there are many Identity and Access Management services offered across campus, some centrally managed (DoIT, AIMS, SMPH, etc.) and some locally managed. We want to understand the business and technical needs that rely on these services to ensure current and future campus needs for directory services and identity data integration continue to be met efficiently and effectively.

Please consider collaborating with your campus peers for a two-hour exploration of IAM service needs. Two fast-paced, interactive workshops will be scheduled in mid to late November. The scheduled days/times will be based on the availability of those who volunteer to participate and you may choose whichever workshop or location, - one on the west side of campus and one on the east side - works best for you.

Please reply to Tamra Dagnon, tamra.dagnon@wisc.edu or Tom Jordan, tom.jordan@wisc.edu to be included in a workshop and to contribute to the conversation.

Thank you!
