

# The Lifelong Learning LMS (L3) Project

automating  
UW-Madison NetID issuance and  
access to online course materials for  
lifelong learners

shortcut to get here: [go.wisc.edu/l3project](https://go.wisc.edu/l3project)

# The Problem

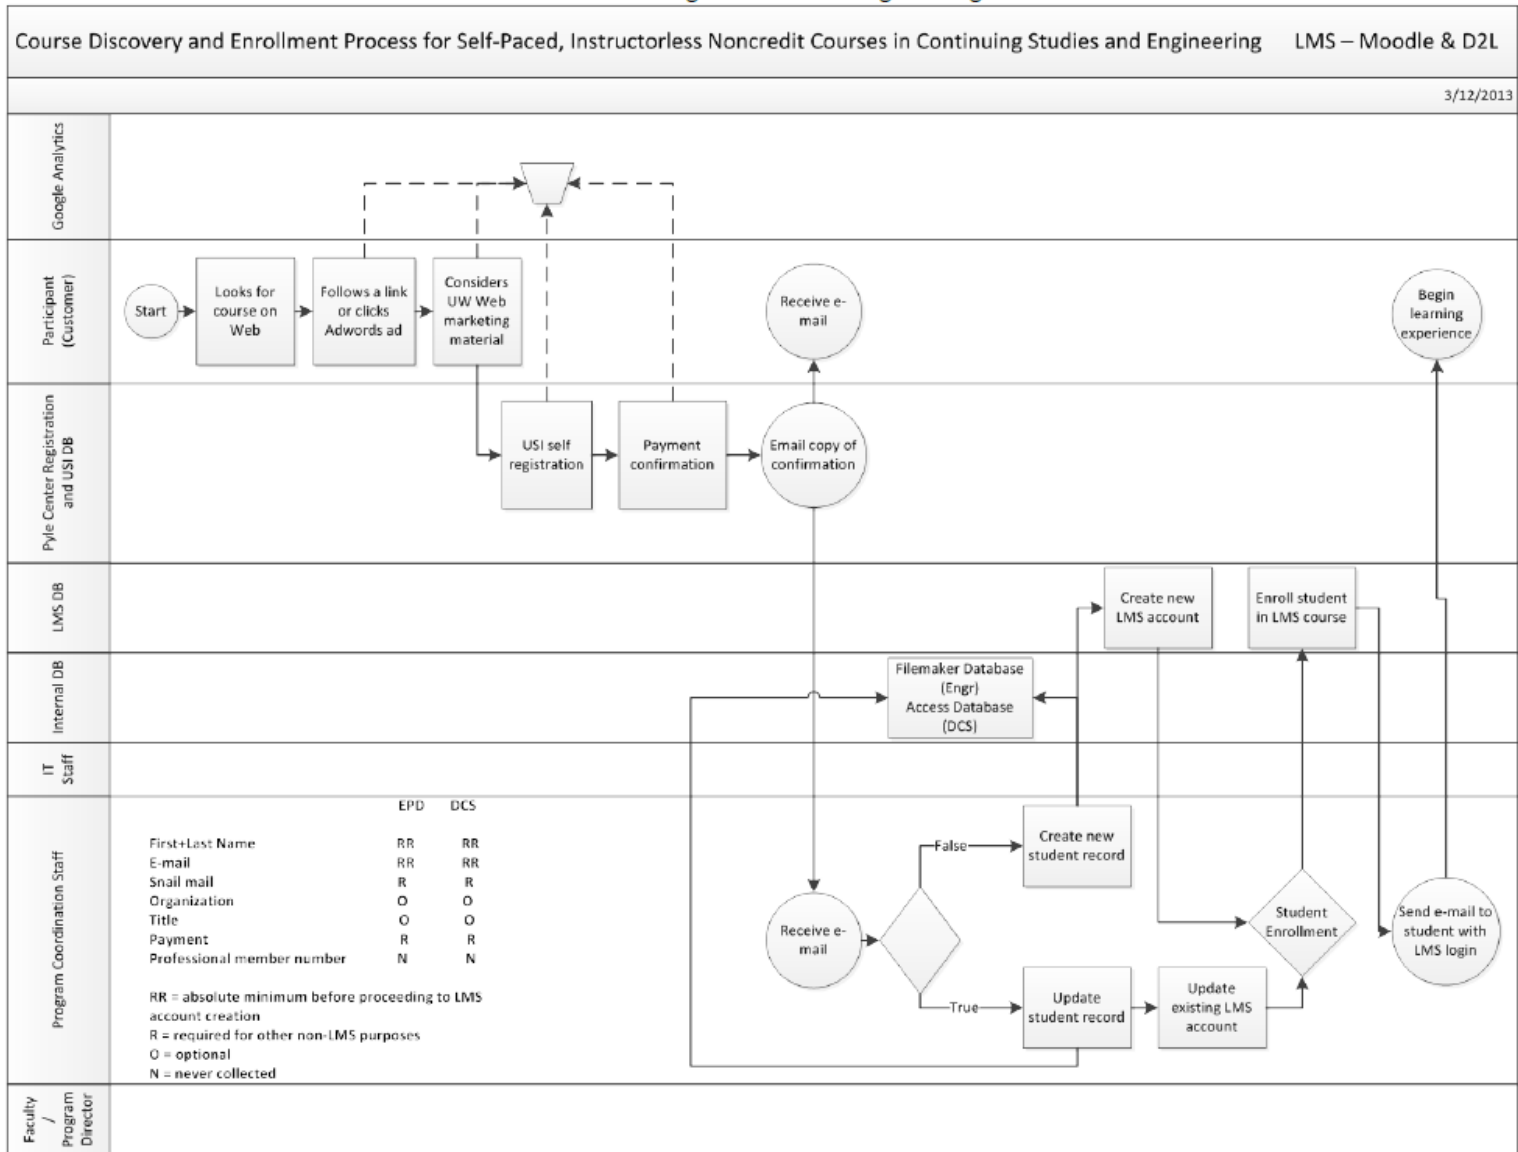

The status quo is:

- **Slow** (learner may wait several days after paying to get access to the course)
- **Expensive** (manual solution adds a per-registration overhead cost, plus human errors)
- **Not scalable** (manual solution is only practical for small volumes)
- **Or completely siloed** (existing automated solutions have no connection to campus records, services, or infrastructure)

## Impact

UW-Madison cannot enter the established, burgeoning market of offering large-scale blended and online education to generate new revenue.

# Before: Example manual solution, different for each academic unit

# The Solution

Project goal: build “the magic in the middle”

"first" = solve this problem in an early phase

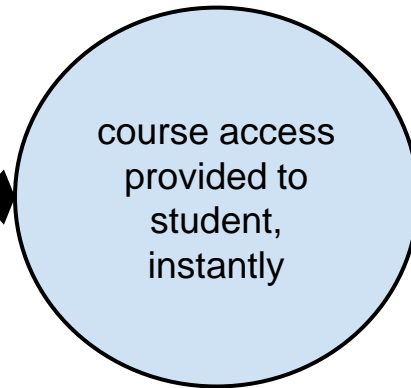

"future" = prepare for eventually solving this

Sources of learner registrations

first

future

Learning tools and services

first

future

SYSTEM	CAPABILITIES
USI	USI User Id Event Registration Registrant info (demographic/contact/custom fields/etc.)
CSIS	Administrative management of courses and learners Identity crosswalk between USI and PersonHub Give learner appropriate LMS destination Initiate new NetID creations Exchange course and registrant info w/ CHub
Campus Identity Management	PersonHub and NetID services establishing unique campus identifiers and logins for all learners
CAOS	Manage class and roster changes Inform LMSes of changes
LMS	Consumer of roster information Provision access to service

## Welcome to the University of Wisconsin-Madison

You have been registered for a program that includes an online course site. Click "Get Started" below and follow the instructions.

[Get Started >](#)

**Keep this e-mail. The link above will always get you to your online course site.**

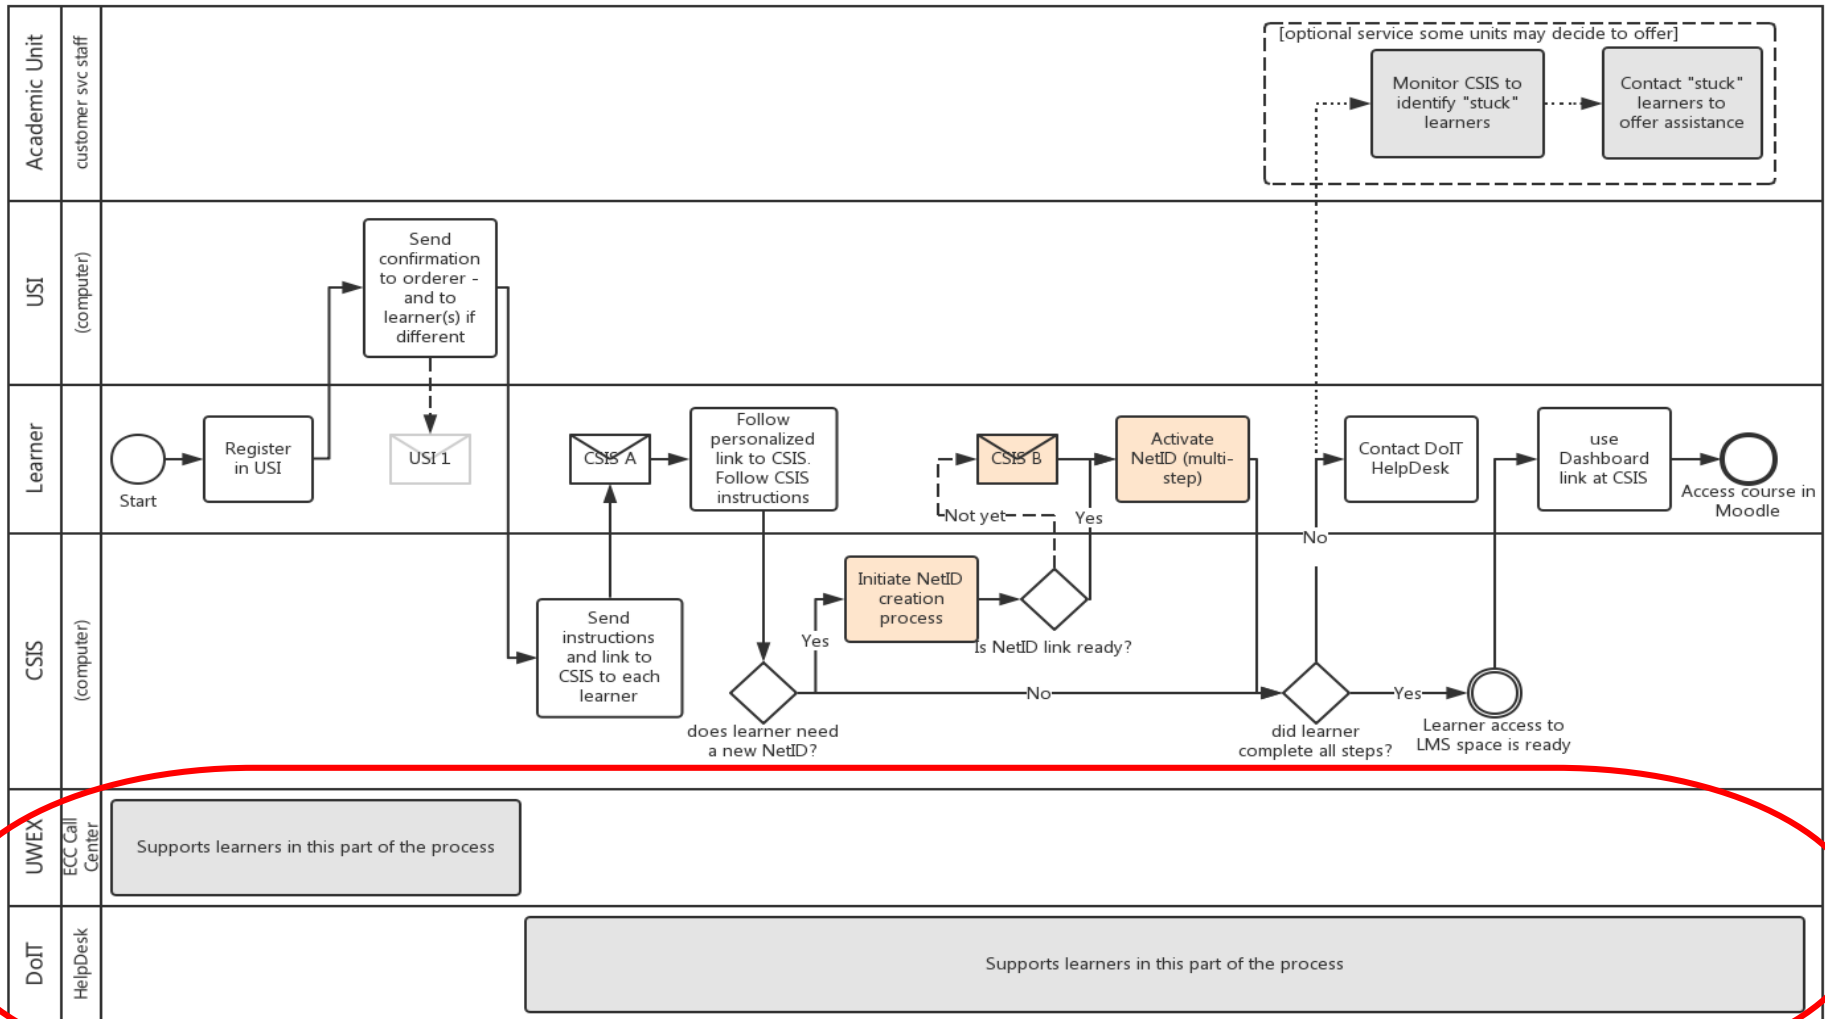

Problems with getting access? [DoIT Help Desk](#) • phone, email, chat, or HelpOnline • 608-264-4357

### Simple Instructions

At a minimum, the solution is visible to every learner by inserting one e-mail (pictured above) between the end of the unit's registration process and reaching UW Course Dashboard.

At a maximum, some learners have to next respond to a series of up to three questions by selecting from a choice of buttons. This determines whether the learner matches an existing UW identity and / or needs a new NetID issued right now.

## Learner support for L3 enrollment process

# The Breakthroughs

Scalable, high-capacity retail education from UW-Madison  
Global “self-paced e-learning” market is ~\$50 billion<sup>[1]</sup>

## NetIDs

via self-serve immediate creation  
for all Badgers (expanded beyond just ISIS-managed)  
for life (no deactivation date or process)

Lifelong learners now invited to the UW “front door”

Opens the door to a future with . . .

MyUW Portal

Social login federation

Unizin

MOOCs on UW terms: \$8.5 billion market by 2020<sup>[2]</sup>
